

Mobile App Development Technologies

■ SHORT QUESTIONS (1-2 lines answers)

1. What is Intent? List its types.

— Intent = message to perform action between components

Types:

- Explicit Intent
 - Implicit Intent
-

2. Android Fragment

— Fragment = small part of Activity UI (reusable screen component)

3. GridView

— GridView = displays items in grid (rows C columns)

4. Types of Menus

-
- Options Menu
 - Context Menu
 - Popup Menu
-

5. Types of Mobile Apps

-
- Native Apps
 - Web Apps
 - Hybrid Apps
-

6. Adapter

— Adapter = connects data to UI (ListView, GridView)

7. runOnUiThread()

- Used to update UI from background thread

8. View

- View = basic UI element (Button, TextView)

G. Android OS

- Android OS = Linux-based mobile operating system

LONG QUESTIONS (Short s Easy Points)

1. Toast (with example)

- Toast = small popup message

```
Toast.makeText(this, "Hello", Toast.LENGTH_SHORT).show();
```

2. Android Service

- Service = runs in background

Types:

- Foreground Service
- Background Service
- Bound Service

3. Addition Program

```
int a = 5, b = 10;  
int sum = a + b;  
System.out.println(sum);
```

4. ViewGroup (any 4)

- ViewGroup = container of views
 - LinearLayout → vertical/horizontal
 - RelativeLayout → relative position
 - ConstraintLayout → flexible UI
 - FrameLayout → single view

5. JSON s XML Parsing

- Used to read data
 - JSON → lightweight, fast
 - XML → structured format

6. Activity Life Cycle

- Steps:
 - onCreate()
 - onStart()
 - onResume()
 - onPause()
 - onStop()
 - onDestroy()

7. Handler

- Used to manage threads C send messages

8. Location Based Services

- Uses GPS to provide location info (maps, tracking)
-

G. Make a Call (Android)

- Use Intent

```
Intent i = new Intent(Intent.ACTION_CALL);  
i.setData(Uri.parse("tel:1234567890"));  
startActivity(i);
```

Mobile App Development Technologies

SHORT QUESTIONS (1–2 मार्क्स)

1. Intent म्हणजे काय? Types सांगा

- **Intent** = Android components (Activity, Service) मध्ये communication साठी message

Types:

- Explicit Intent
 - Implicit Intent
-

2. Android Fragment

- **Fragment** = Activity चा छोटा UI भाग (reusable component)
-

3. GridView

- **GridView** = items grid (rows आणि columns) मध्ये दाखवतो
-

4. Types of Menus

- Options Menu
 - Context Menu
 - Popup Menu
-

5. Types of Mobile Apps

- Native Apps
 - Web Apps
 - Hybrid Apps
-

6. Adapter

- **Adapter** = data आणि UI (ListView, GridView) connect करतो
-

7. runOnUiThread()

- Background thread मधून UI update करण्यासाठी वापरतात
-

8. View

- **View** = basic UI element (Button, TextView)
-

9. Android OS

- **Android OS** = Linux-based mobile operating system
-

LONG QUESTIONS (Short Points)

1. Toast (example सहित)

- **Toast** = छोटा popup message

Toast.makeText(this, "Hello", Toast.LENGTH_SHORT).show();

2. Android Service

- **Service** = background मध्ये run होणारा component

Types:

- Foreground Service
- Background Service
- Bound Service

3. Addition Program

```
int a = 5, b = 10;  
int sum = a + b;  
System.out.println(sum);
```

4. ViewGroup (any 4)

- **ViewGroup** = views ठेवण्यासाठी container

Types:

- LinearLayout → vertical / horizontal
 - RelativeLayout → relative position
 - ConstraintLayout → flexible UI
 - FrameLayout → single view
-

5. JSON & XML Parsing

- Data read करण्यासाठी वापरतात
 - JSON → lightweight आणि fast
 - XML → structured format
-

6. Activity Life Cycle

Steps:

- onCreate()
 - onStart()
 - onResume()
 - onPause()
 - onStop()
 - onDestroy()
-

7. Handler

- Threads manage करण्यासाठी आणि message पाठवण्यासाठी वापरतात
-

8. Location Based Services

- GPS वापरून location माहिती देतात

👉 उदाहरण: maps, tracking

9. Make a Call (Android)

- Intent वापरून call करू शकतो

```
Intent i = new Intent(Intent.ACTION_CALL);  
i.setData(Uri.parse("tel:1234567890"));  
startActivity(i);
```
